

RENEWCARE HOME HEALTH'S WOUND CARE PROGRAM

RenewCare Home Health recognizes that many of our patients need specialized nursing care. Patients with acute or chronic wounds gain independence and better health through the care of our specially trained staff. Our wound care team of registered nurses and wound ostomy-certified nurses (WOCNs) have received advanced training in wound care and wound products. The RNs make recommendations for the most appropriate, evidence-based wound treatment regimens to shorten healing time.

Services Offered

- Basic care, such as cleaning wounds, changing dressings and administering antibiotic therapy (if prescribed)
- Education for patients and caregivers on how to change wound dressings, manage pain and recognize possible complications
- State-of-the-art therapies, such as a Vacuum Assisted Closure (Vac), which stimulates growth and helps wounds heal faster
- Coordination of care with your doctor, including sending digital pictures of your wound

Types of wound care provided:

- Prevention of pressure ulcers
- Selection of pressure-reducing support surfaces
- Wound product selection
- Braden scale assessments performed on all patients to identify those at risk for skin breakdown
- Fistulas
- Pressure ulcers
- Surgical wounds
- Stasis ulcers
- Traumatic ulcers
